¹ Information gathered from Notice Of Pendency (Doc. #118-10) at 15-17 and Memorandum In Support Of Fourth Motion (Doc. #117) at 4-6.

² Out of pocket loss is calculated as the purchase/acquisition price minus the sales price.

³ \$3.24 represents the sum of the total stock price change resulting from alleged revelations of true facts on April 23, 2009 and November 2, 2009.

The recognized loss of Group A is discounted by 95 per cent to reflect the fact that these investors did not hold the shares through any alleged corrective disclosure and therefore would not have suffered damages under the model plaintiffs would have presented at trial. The settlement nevertheless provides a recognized loss of five per cent to compensate for releasing any claim of liability against defendants.

⁴ \$1.03 represents the average closing price between November 2, 2009 and January 29, 2010.

⁵ \$0.91 represents the stock price change resulting from the revelation of facts on April 23, 2009.

⁶ \$2.33 represents the stock price change resulting from the revelation of facts on November 2, 2009.

The 30 per cent discount for Groups E and F is based on counsel's determination that had this case continued, such purchasers would have been subject to a higher degree of litigation risk with respect to meeting the reliance requirement.

⁷ The recognized loss of Group G is discounted by 95 per cent to reflect the fact that these investors did not hold the shares through any alleged corrective disclosure and therefore would not have suffered damages under the model plaintiffs would have presented at trial. The settlement provides a recognized loss of five per cent to compensate for releasing any claim of liability against defendants.
